

Editing Keywords in Dreamweaver CS4

One of the biggest time savers in Dreamweaver is knowing how to edit the keywords WITHOUT having to search through lines and lines of code. Below is a quick step by step tutorial on how to edit keywords in Dreamweaver. Visit my other tutorials to learn more about the importance of keywords or how to insert keywords in a Dreamweaver webpage.

At the top of the page, select View, Head Content. (Or hit Ctrl+Shift+H on a PC)

This will open a toolbar beneath the panel where it says Code, Split, Design. Select the key symbol (last item).

This will open a dialog box at the bottom of the page.

I have already put a couple keywords in mine. Separate new keywords and phrases with a comma.
